MARKET COMMENTARY

March was another volatile month for equities, as countries around the world entered Covid-19 lock-down. The Dow Jones fell 27% to mid-March, before a sharp revival saw it enter a technical bull market. Nevertheless, equities still sold off 13% over the period. Governments and central banks took evasive action, with the Bank of England cutting rates to a record 0.1% and sanctioning a £200bn QE programme to help businesses survive a lengthy period of inactivity. Gilt yields fell by 0.1% over the month, and Sterling dropped from \$1.29 to \$1.24, having dropped as low as \$1.15, its lowest level for over 35 years. The Brent Crude oil price fell to nearly \$20 a barrel, its lowest for over 20 years, as demand evaporated.

PERIODIC TABLE OF ASSET CLASSES

The chart below shows stacked performance figures for selected asset classes from best to worst. From left to right it shows a monthly performance for the last 12 months, then the YTD, 1yr and 3yr numbers. Gilt returns run across the middle, with anything above it outperforming and anything below underperforming.

STAT OF THE MONTH

11 trading days

The fastest bull — bear — bull market ever seen. Only 1929 is close (18 days).

GPS VIEWPOINT

Diversification: Back in Fashion

Over the last ten years we have had it easy. Investing in pretty much anything would have produced strong returns, so it is not surprising that investors have bought into the market as cheaply as possible: why pay more if it makes no difference?

However, over the last six weeks cheap and passive would have been the last place an investor wanted to be. We have seen countries lock down cities and borders, and people become rightly fearful about their health and their livelihoods. Nobody working today has lived through anything like this and the markets have reacted sharply and quickly. Equities are down 24% from their peak in February (having given up 34% before a month-end recovery), credit spreads have blown out to 10% and the oil price has dropped to \$20 per barrel.

There is good news though: good old-fashioned diversification has worked. Those that did not throw in the towel and jump on to the passive bandwagon are now a lot happier than those that did. The “on trend” allocations to risk-parity and equities are coming under pressure and there are major cracks in credit and lending markets. However, our Multi-Asset Fund has allocations to funds that are actually producing positive returns in this environment, including volatility trading, and the value of diversification is now being seen.

QUOTE OF THE MONTH

*It's the end of the world as we know it,
and I feel fine.*

REM

'It's the end of the world as we know it'

Important Information

Investors should read and carefully consider the Fund's offering documentation in full prior to making any investment decision in relation to the Fund.
